

## **The OW2 Community Showcases Open Source Cloud Computing at Cloud Expo Europe 2011**

*Key Members of the OW2 Community will be on site to show CompatibleOne and the Open Source Cloudware initiative, of open source cloud computing*

**London, February 2, 2011** – The OW2 Community will be proudly showing a selection of world-class open source projects for cloud computing, all of which benefit from professional support provided by independent companies.

On the OW2 booth, visitors will be able to discover the CompatibleOne project and the Open Source Cloudware initiative:

- **CompatibleOne:** Carried out by a consortium of 15 partners, CompatibleOne addresses the 3 layers of Cloud Computing with a global and unified solution. It provides an open cloudware for the creation, deployment and management of private, public and hybrid cloud platforms.
- **Open Source Cloudware initiative (OSCi):** OSCi is a unique collective effort to build a common vision of what should be an open cloud based on open source and open standards. It also aims at developing key software technologies according to an R&D agenda collaboratively defined.

OW2 Members supporting the presentations of CompatibleOne and OSCi at Cloud Expo Europe's OW2 booth include ActiveEon, Enovance, Prologue and UShareSoft. These members also provide professional support to the community's open source projects in the form of training, technical expertise, systems integration, etc.

*“A coordinated community effort is the most efficient way to develop the open source software stack for cloud computing,”* says Cedric Thomas, OW2 Consortium CEO *“This is what we came to demonstrate at Cloud Expo Europe this year”* he adds.

In 2010, through a number of initiatives and events, the OW2 Consortium became the leading open source community working on cloud computing.

### **About OW2**

Founded in January 2007, OW2 is an independent industry community dedicated to developing open source code infrastructure (middleware and generic applications) and to fostering a vibrant community and business ecosystem. The OW2 Consortium hosts some one hundred technology projects, including Acceleo, ASM, Bonita, eXo Platform, JOnAS, Lomboz, Orbeon Forms, PetALS, SpagoBI, Talend and XWiki.
