

Javaone Hosts the International Preview of the New SpagoBI Version 2.0

San Francisco - May 6, 2008 - The OW2 Consortium announces the forthcoming release of the 2.0 version of SpagoBI, the Free Business Intelligence Platform. The preview of SpagoBI 2.0 is presented during the JavaOne 2008 exhibition at the OW2 Village. The release of the beta version will be available next June, 2008.

SpagoBI 2.0 offers many new functionalities that help the decision making and operative users to analyze and profile their current and strategic business. The new graphic interface, simple and attractive, allows an easy use of the various analytical documents managed by a consolidated and architecturally reinforced platform. Main modules of the platform are:

- SpagoBI Server, the already known BI platform with many updates
- SpagoBI Studio, the new integrated development environment
- SpagoBI Meta, the environment focused on metadata
- SpagoBI SDK, the integration layer to use SpagoBI from external tools
- SpagoBI Applications, to collect the vertical analytical models built using SpagoBI

“The SpagoBI 2.0 release is a significant step forward in the development of open source solutions for business intelligence” – says Gabriele Ruffatti, the Architectures and Consulting Director of Engineering Ingegneria Informatica, the company providing professional support for the SpagoBI Project. “The new components and the service oriented architecture make SpagoBI 2.0 a cutting edge innovative solution, extremely flexible to end users’ needs”.

More SpagoBI 2.0 presentations are coming: the Italian preview at Forum PA (Rome, Italy) – May 12-15; the French preview in Paris, France, next June.

About Engineering Ingegneria Informatica

Founded in 1980, Engineering Group is the first Italian system integrator with a complete offering along the entire software supply chain: consulting, outsourcing, projects and proprietary solutions in all vertical markets. Visit www.eng.it

About OW2

Founded in January 2007 OW2 is an independent industry community dedicated to developing open source code middleware and to fostering a vibrant community and business ecosystem. The OW2 Consortium hosts some one hundred technology Projects, including Acceleo, ASM, Bonita, eXo Platform, Funambol, JOnAS, Lombos, Orbeon Forms, SpagoBI and XWiki. Visit www.ow2.org
