Spago4Q

- defines models (*based on Goal Question Metrics or assessment framework CMMI, ISO9001-2000*)
- defines KPIs and thresholds
- defines required data
- extracts information from measurement tools
- calculates KPIs
- displays the KPIs results
- produces analytical documents

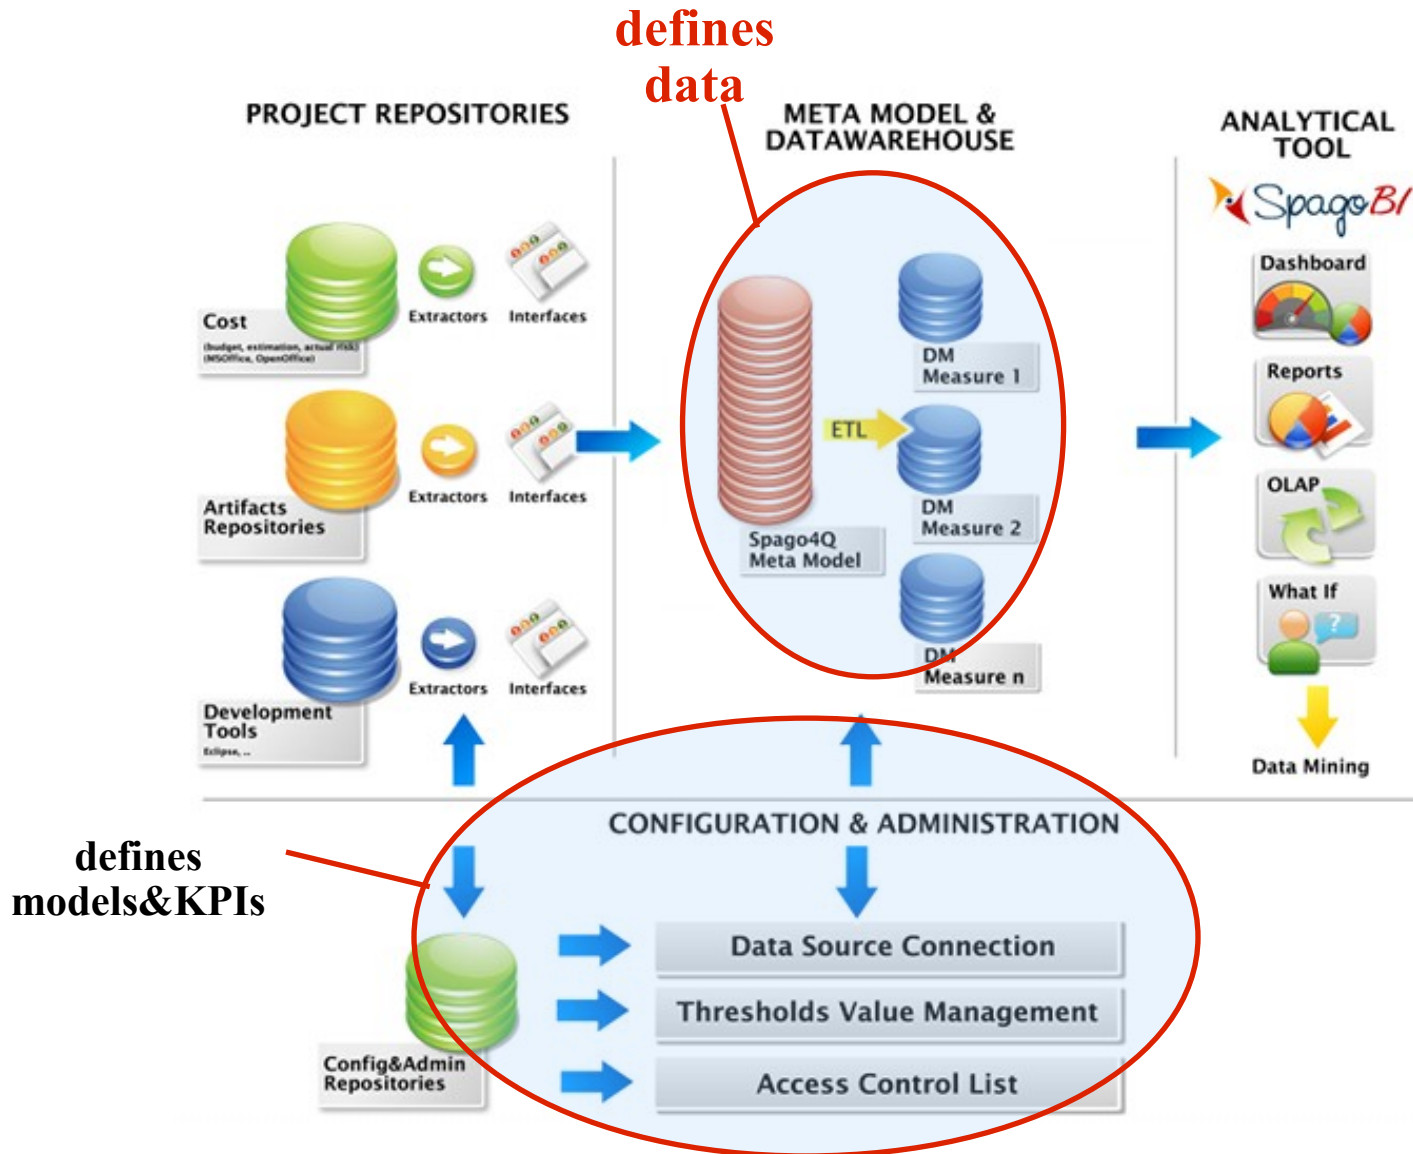

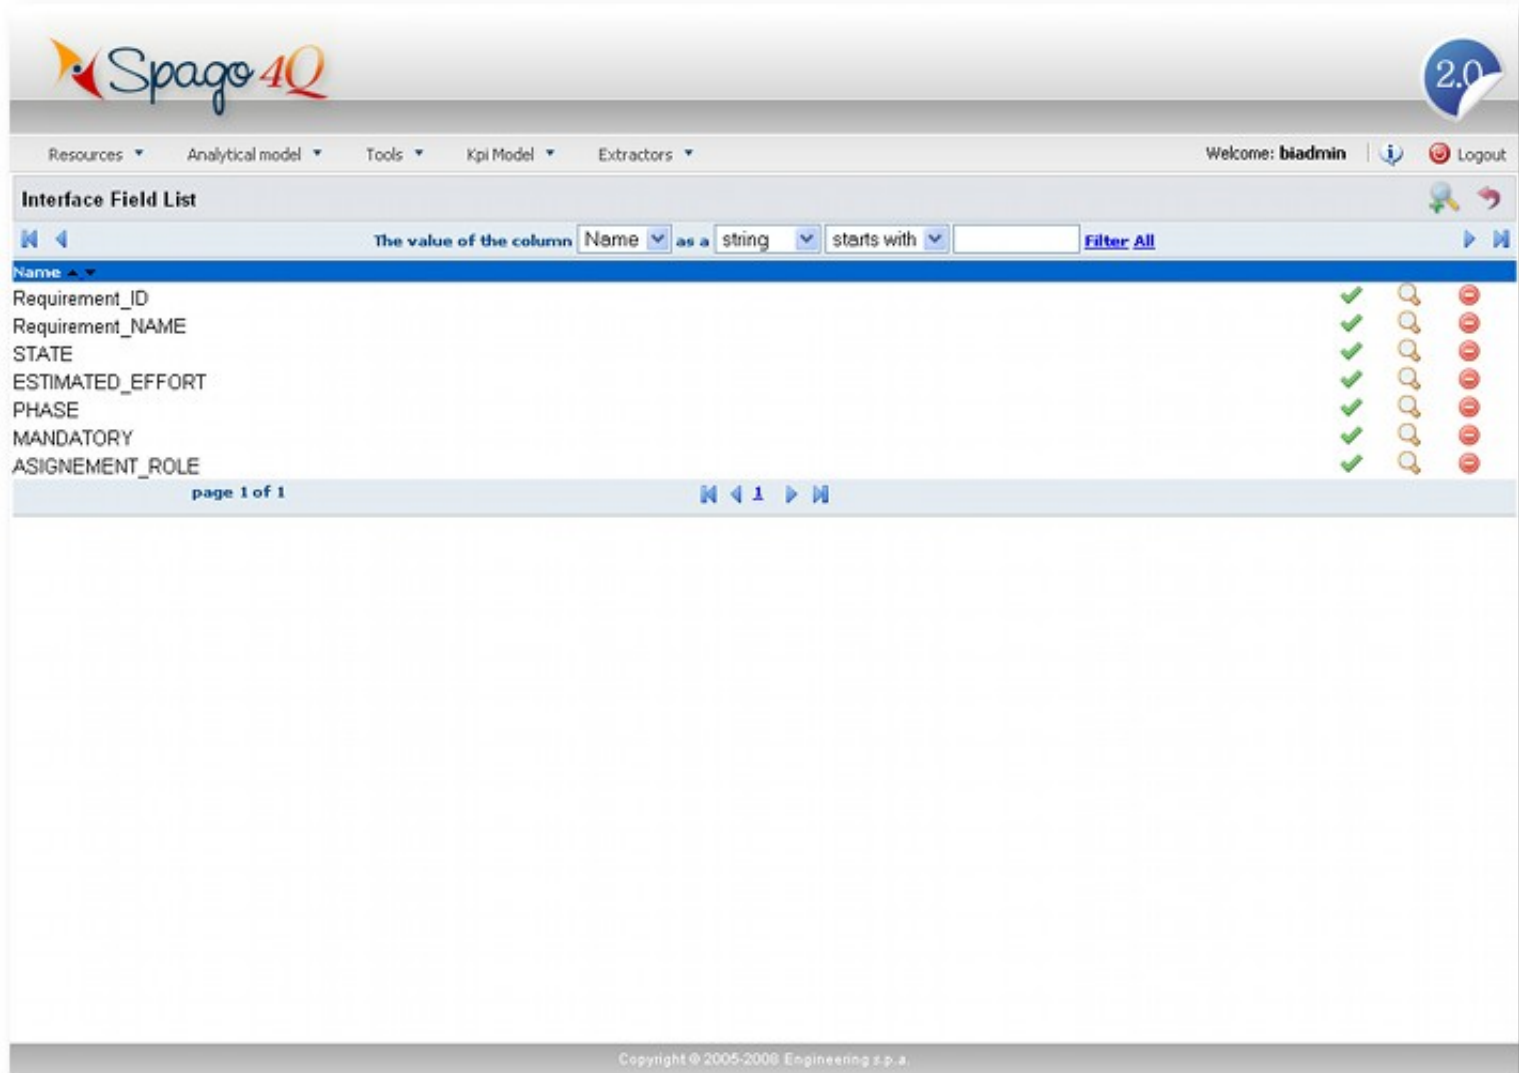

The screenshot displays the Spago 4Q software interface. The top navigation bar includes 'Resources', 'Analytical model', 'Tools', 'Kpi Model', and 'Extractors'. The user is logged in as 'biadmin'. The main window is titled 'Model Definition Tree Detail' and shows a hierarchical tree structure on the left. The selected node is 'DAR-SP1.1-1 - Establish Guidelines for Deci...'. The right pane shows the 'Model Definition' form with the following fields:

Name	Establish Guidelines for Decision Analysis *
Description	Establish Guidelines for Decision Analysis
Code	DAR-SP1.1-1
Type Name	Generic Node
Type Description	

Below the form is the 'Model Attributes' section. The footer of the application reads 'Copyright © 2005-2006 Engineering s.p.a.'.

Defines Required Data

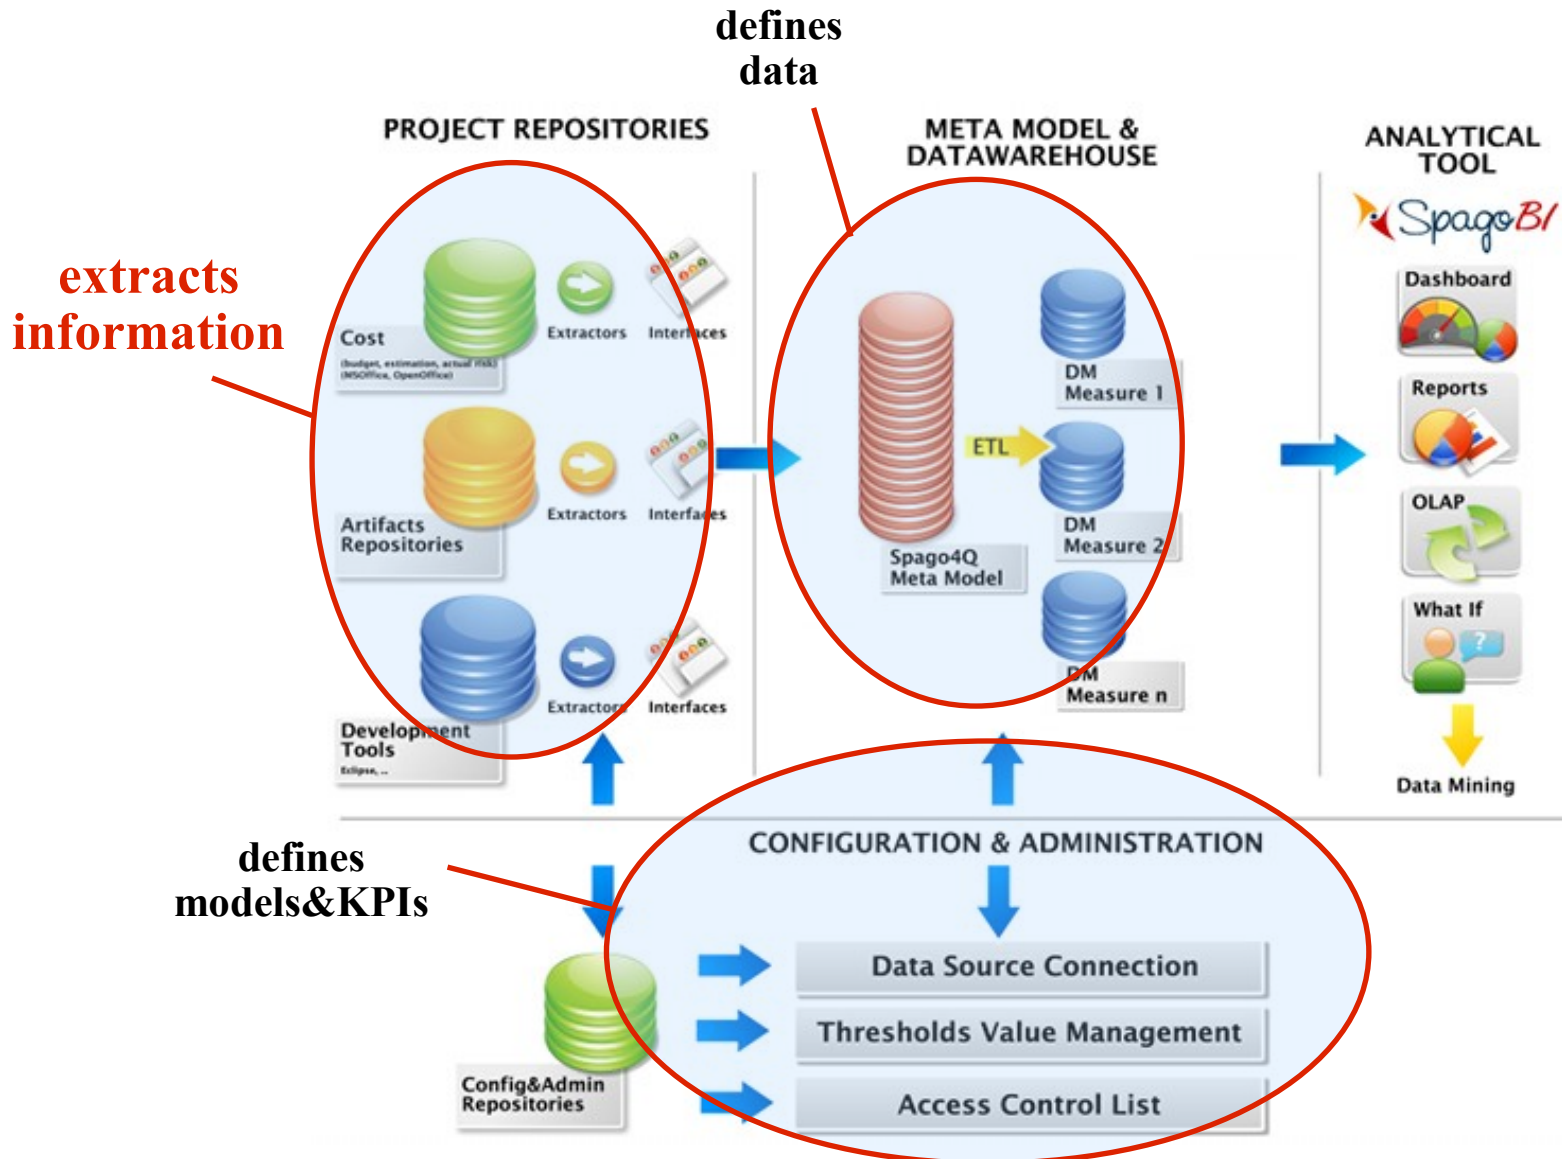

The screenshot shows the Spago 4Q web application interface. At the top left is the Spago 4Q logo. The navigation menu includes Resources, Analytical model, Tools, Kpi Model, and Extractors. The user is logged in as 'biadmin'. The main content area is titled 'Interface Field List' and features a search filter: 'The value of the column Name as a string starts with'. Below the filter is a table of fields with status icons.

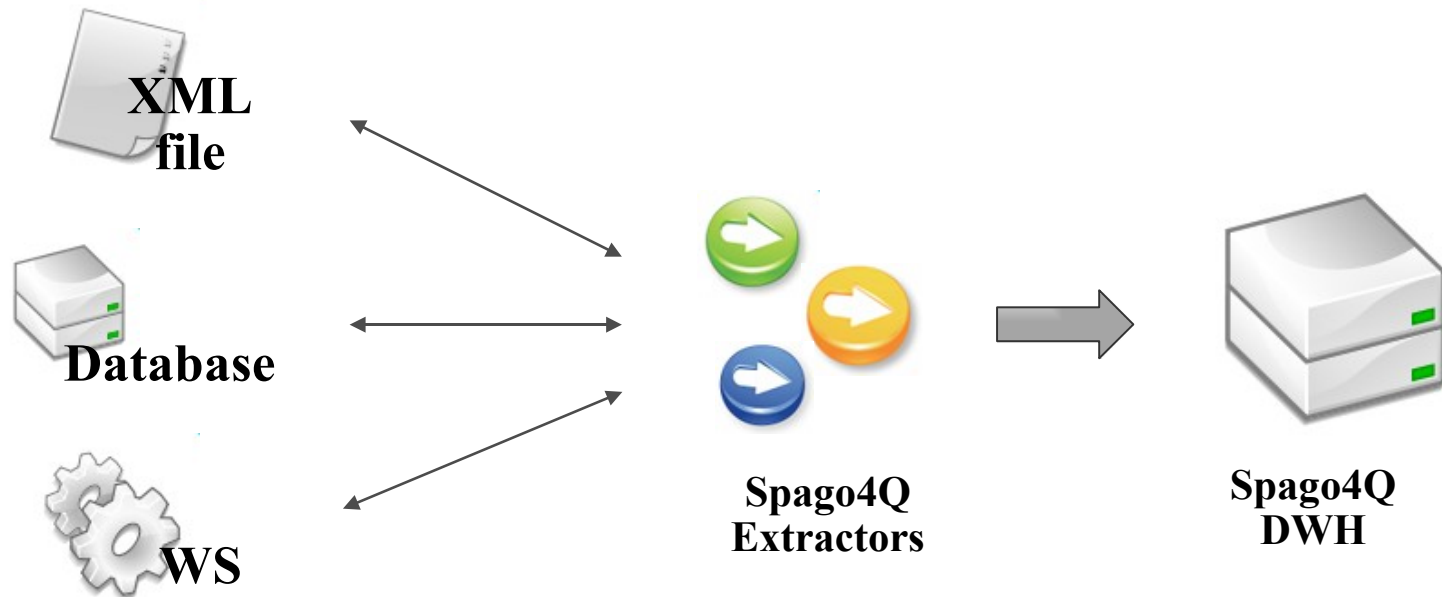

Name	Green Checkmark	Yellow Magnifying Glass	Red Circle with X
Requirement_ID	✓	🔍	✗
Requirement_NAME	✓	🔍	✗
STATE	✓	🔍	✗
ESTIMATED_EFFORT	✓	🔍	✗
PHASE	✓	🔍	✗
MANDATORY	✓	🔍	✗
ASIGNEMENT_ROLE	✓	🔍	✗

- **Spago4Q Extraction Process**
 - configure a default extractor
 - develop and configure a custom extractor

Architecture

The screenshot shows the Spago 4Q 2.0 web interface. At the top, there is a navigation menu with items: Resources, Analytical model, Tools, Kpi Model, and Extractors. The user is logged in as 'biadmin'. The main section is titled 'Detail Data Set' and contains the following fields:

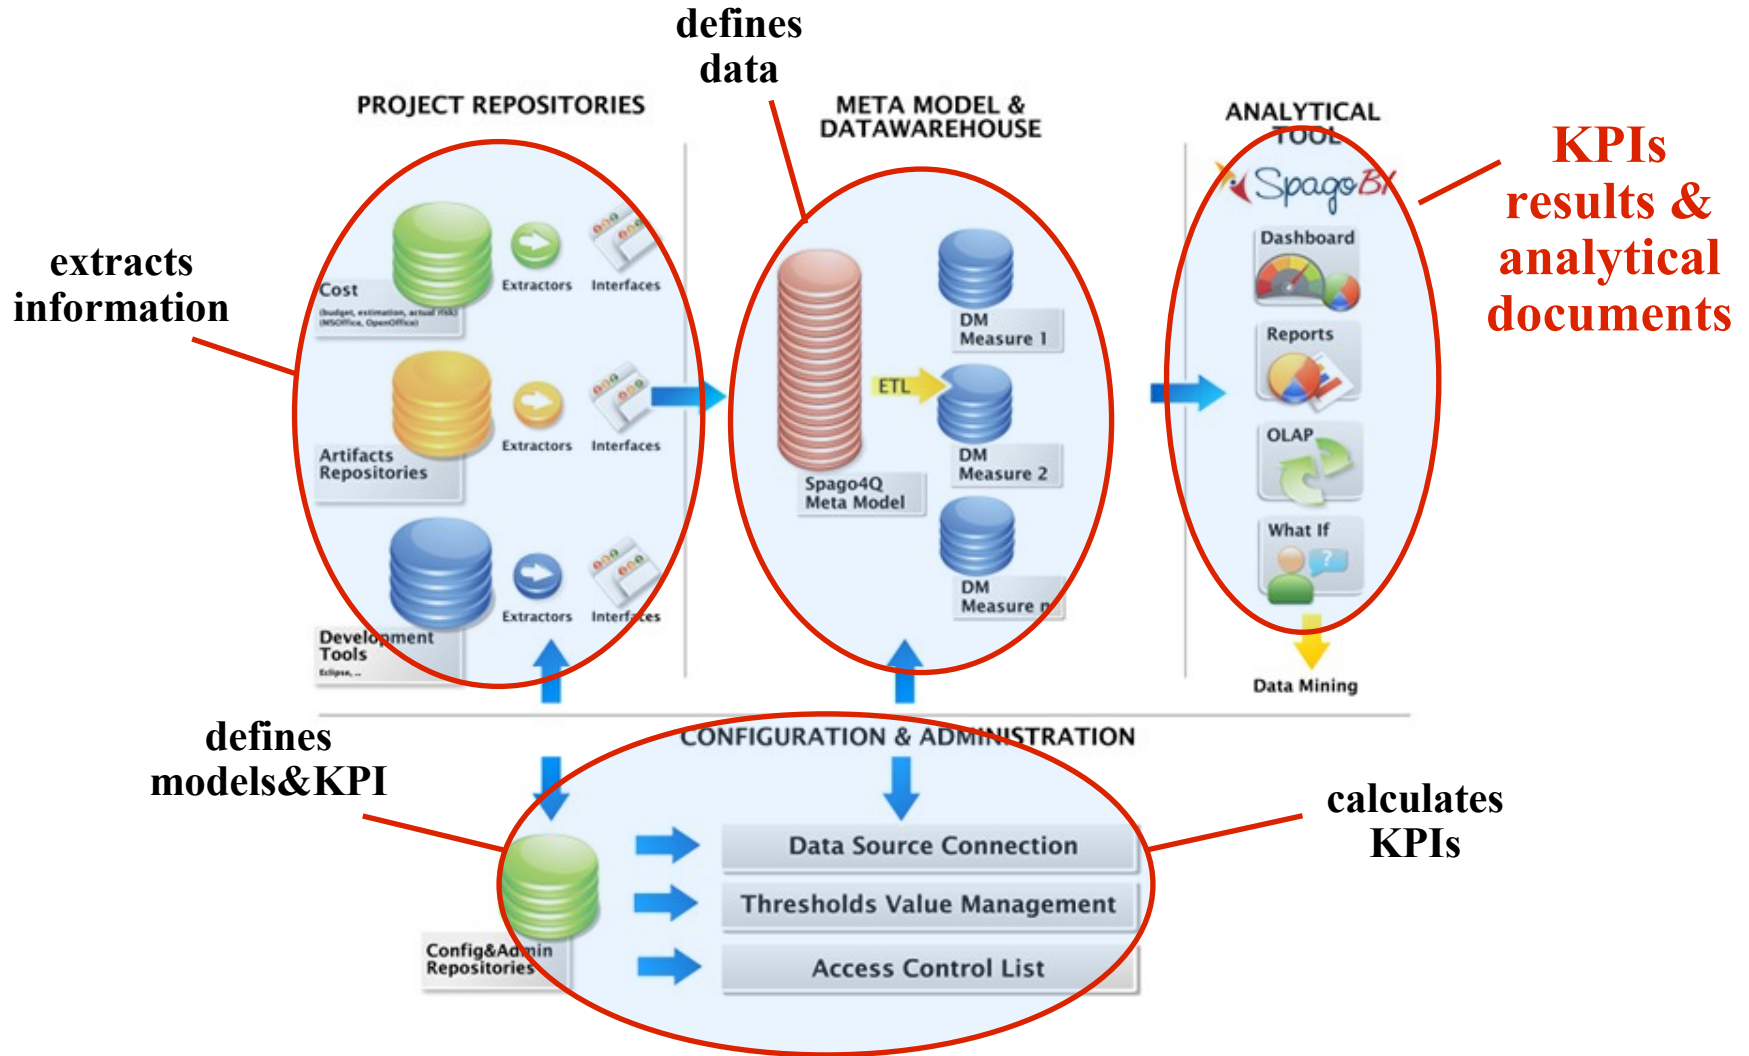

- LABEL:** Test_KPI *
- NAME:** Test_KPI *
- DESCR:** (empty text box)
- TYPE:** Radio buttons for File, Query (selected), Web Service, Script, and JavaClass.
- Query:**

```
SELECT e.full_name,d.departaent_description FROM employee e,department d
where d.department_id=e.department_id
and d.department_description like ?P(department)
```
- Data Source:** FoodMart (dropdown menu)
- Transformer:** (empty dropdown menu)

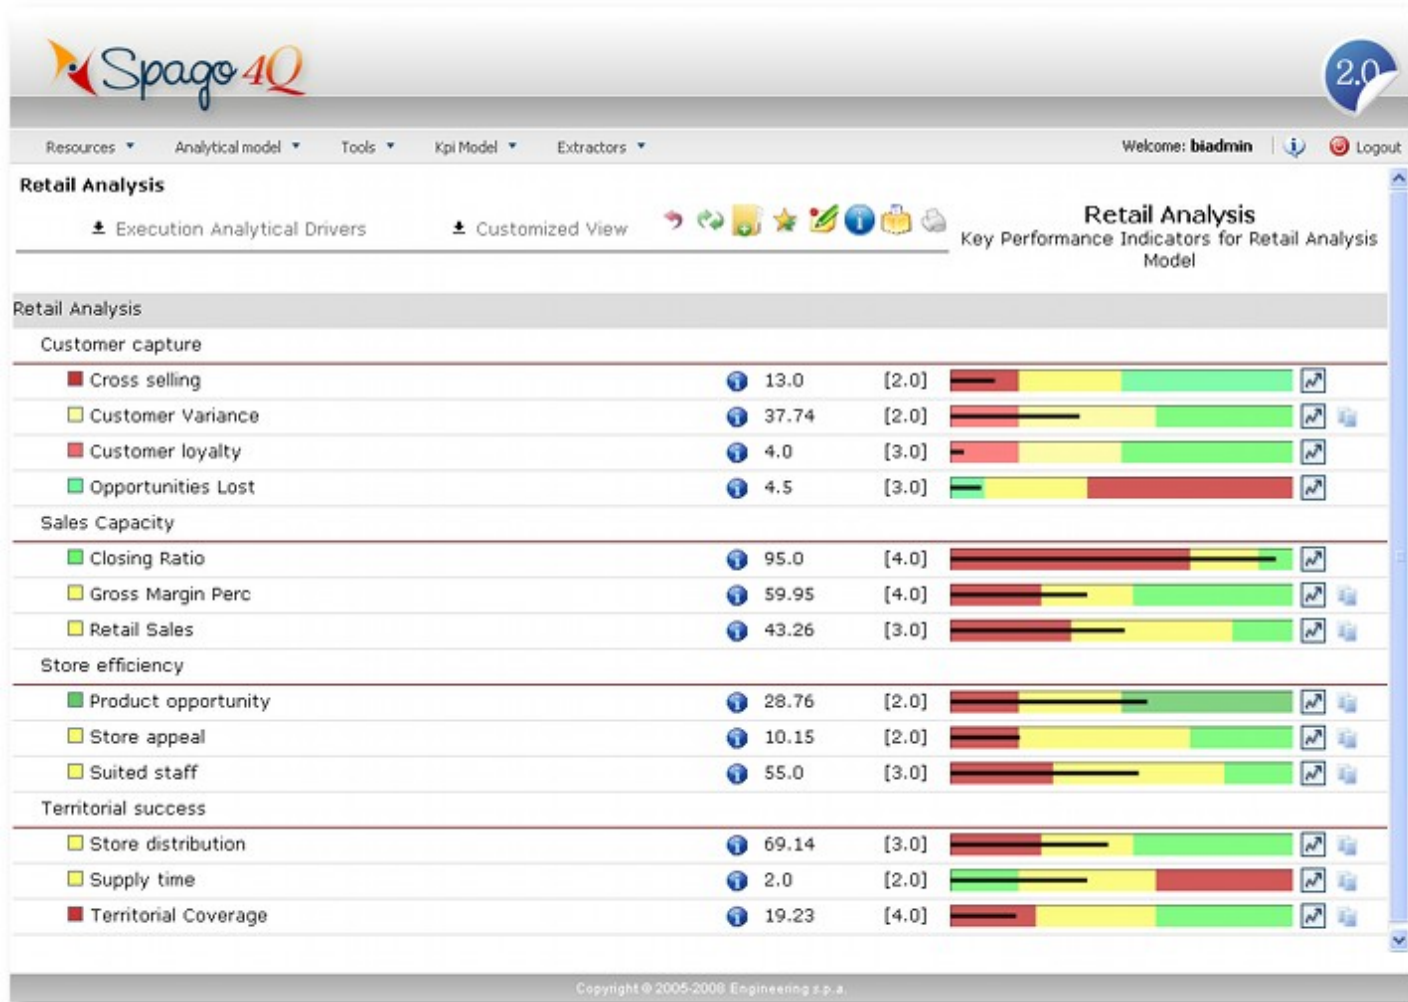

Below this section is the 'DataSet Analytical Drivers' area, which includes:

- Name:** (empty text box) *
- Type:** String (dropdown menu)
- Add:** (green plus icon)

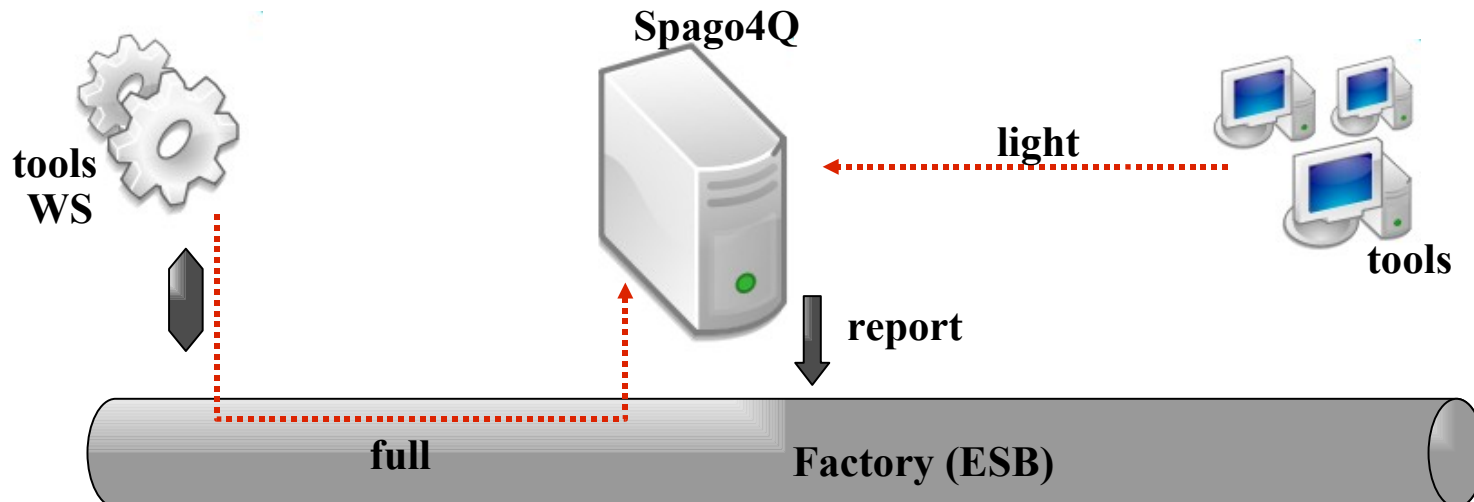

At the bottom, there is a table header with columns 'Name' and 'Type'. The footer contains the text: Copyright © 2005-2008 Engineering s.p.a.

Display the KPIs Results

- **Integrate Spago4Q**
 - provide analysis reports
- **Integrate measurement tools (Web Services)**
- **Spago4Q extracts information from the tools directly and through the Factory (ESB)**

Calendario corsi CMMI 2008

16 Gennaio 2008

Definire il calendario 2008 per le sessioni di formazione CMMI. L'obiettivo didattico è divulgare il PWB realizzato durante il percorso di certificazione aziendale al maturity level 3 del modello, rendendo fruibile a sezione e progetti l'assetto di mezzi e strumenti che ne costituiscono la dotazione (base di accesso; biblioteca di policies, procedure e lessons learned; library di modelli e di esempr. tools).

PROGETTI IN CORSO

Geocal si integra con iPhone e GoogleMaps

Orethi annuncia il rilascio della nuova release del modul Geoware disponibile anche per l'Apple iPhone e Mobile di Geocal che integra la tecnologia Google Maps.

Open Tech: lancio di SpagoBI 2.0 - Parigi

Engineering, in collaborazione con Silicon Berlin, presenta la nuova versione 2.0 di SpagoBI, la piattaforma libera di Business Intelligence.

[Scarica il programma completo](#)

Nuovi standard di presentazione PowerPoint

E' disponibile in MySelf® Standard di comunicazione fagionamento dell'area "Standard di Presentazione Powerpoint" contenente tutte le indicazioni standard per realizzare una presentazione in formato Powerpoint in lingua italiana ed inglese.

RASSEGNA STAMPA

L'applicazione del Modello di Prevenzione dei Rischii (ex D.Lgs. 231/2001)

09/12/2008

Il documento descrive un esempio di applicazione del modello di Organizzazione e Gestione finalizzato alla copertura aziendale nei confronti del reato contro la Pubblica Amministrazione.

European Commission Directorate General Regional Policy (DG REGIO) project

DG REGIO's core activity consists of funding projects and programmes in regions all over Europe.

The project provides services to analyse, develop, maintain and support all information systems, applications and tools that DG REGIO needs to carry on its business.

In the context of the project, Spago4Q has been adopted by Engineering to cover the specific needs of DG Regio, monitoring by means a dashboard the Service Level Agreement for each services and producing periodically the official reports.

In order to collect the data required for monitoring the SLAs and KPIs, Spago4Q will connect and extract information from various data sources and supporting tools included in the project management infrastructure.
