

Open Source: the Right Model for Infrastructure Software

Companies can cooperate on developing common infrastructure modules while at the same time continue to compete in the delivery of the business solutions.

A global ***community*** working together to
develop open source middleware* and to
foster a vibrant business ecosystem

**Middleware at large, including tools for the development, deployment and management of distributed applications*

In 2007, ObjecWeb and OrientWare merge to form OW2

Consortium Structure Overview

Same as a company but with specific constituents
