Status

Company

Mission

Develop an efficient monitoring system

Objective

Help the management and sharing of information about local healthcare expenses

Country

Netherlands

OW2 Project

SpagoBI

Thanks to SpagoBI, Rendter supports Dutch municipalities to manage and share information about local healthcare expenses.

SpagoBI helps the management of 3 million of data per days

Thanks to Talend, SpagoBI Technology Partner, every night 3 million of records are collected from 40 municipalities and loaded into a central datawarehouse. Each user accesses to its authorized data sets, under the control of the behavioural model, and can browse them through drill down functions. Employees and managers can achieve a deeper knowledge on data such as the number of healthcare requests and contacts, total costs and more, along various criterias such as healthcare supplier, municipality, product name, etc.

Stuurcijfers

Het idee achter Stuurcijfers

Met real time samengestelde Stuurcijfers is het mogelijk om de meest actuele prestaties van uw organisatie, dienst of afdeling, te analyseren en bij te sturen.

Stuurinformatie is iets anders dan managementinformatie. Stuurinformatie wordt actiever ingezet dan managementinformatie. Het is te vergelijken met het dashboard van een auto: de snelheid is stuurinformatie, hoeveel brandstof de auto verbruikt heeft of de gemiddelde snelheid is managementinformatie. ... Lees meer ...

Email: info@rendter.nl
Tel: 0181-772852

RENDER develops web concepts for its customers and supports the rollout of their business.

The adoption of SpagoBI is allowing Dutch municipalities to monitor the local healthcare expense, identifying the total cost of each domain (care for elderly, disabled, youth people and so on).

Key Benefits

In conclusion, SpagoBI helps Dutch municipalities to:

- ▶ Manage a large amount of data, updating each day
- ▶ Improve the monitoring system supporting the information management and sharing of data with different types of users

Professional Support

spagobi@eng.it
