

## The OW2 Community Showcases Leading-Edge Open Source Projects at JavaOne 2008

*Key Members of the OW2 Community will be on site to demonstrate leading-edge open source projects for the enterprise information system*

**San Francisco, June 1, 2009** – The OW2 Community is once again present at JavaOne. The community will be proudly showing a selection of world-class open source projects for the enterprise information system, all of which benefit from professional support provided by independent companies.

On the OW2 booth (#116), visitors will be able to see OW2 middleware in action through the following demonstrations provided by community members.

- **eXo Platform Portal 2.0 and eXo WebOS:** The collaborative open source for enterprise.
- **JOnAS 5:** Flexible OSGi based application server, Java EE (tm) 5 certified.
- **Orbeon Form Builder:** Create, publish and manage advanced forms right from your web browser.
- **Talend Open Studio and Talend Open Profiler:** The leading open source data integration software.
- **XWiki enterprise:** Work better together with XWiki open source collaboration solutions.

OW2 Members supporting the demonstrations at JavaOne's OW2 booth include Bull, eXo Platform, Orbeon, Talend and Xwiki. These members also provide professional support to the community's open source projects in the form of training, technical expertise, systems integration, etc.

*"We are pleased to be taking part in JavaOne again this year", says Cedric Thomas, OW2 Consortium CEO "Our presence here serves to prove that our open source community's momentum is undeterred by the current uncertain economic context."* he adds.

The OW2 Consortium aims through exhibiting at JavaOne to boost market awareness for its enterprise-class middleware projects and to develop contributions and membership from North America.

### About OW2

Founded in January 2007 OW2 is an independent industry community dedicated to developing open source code middleware and to fostering a vibrant community and business ecosystem. The OW2 Consortium hosts some one hundred technology Projects, including Acceleo, ASM, Bonita, eXo Platform, Funambol, JOnAS, Lomboz, Orbeon Forms, SpagoBI and Xwiki.
